PREFACE

Pakistan's agro-food sector is a principal part of the national economy. It accounts for a large share of GDP, employment and export earnings. The country's main export strengths in this field include rice, sesame, horticulture and processed foods. Rice, including Basmati and other long-grain varieties, is supplied to markets in Asia, the Middle East, Africa and Europe. Sesame is exported for oil, confectionery and related industrial use. Horticulture covers fresh and processed fruits and vegetables, citrus, mangoes, dates, onions, potatoes, chillies, dry fruits and honey. Processed foods include spices, edible oils, snacks and packaged products for retail and food service. These products are offered with increasing attention to quality, documentation, packing and destination requirements.

FoodAg is the international food and agriculture exhibition organised by the Trade Development Authority of Pakistan. The 4th edition will be held from 23–26 November 2026 at Expo Centre, Karachi, under the theme "Harvesting Innovation, Cultivating Sustainability." The exhibition presents Pakistani producers, processors and exporters to international buyers and to domestic industry participants. It includes an exhibition floor, scheduled business meetings and official engagements on trade and market access.

TDAP organises FoodAg with the support of the Ministry of Commerce. The work of both institutions includes export promotion, market access, buyer facilitation, compliance support and trade information. This Directory is issued as part of that work. It is intended for international buyers seeking suppliers, for local agro-food visitors identifying products and partners, and for decision makers who require a clear record of participating firms and the structure of the event.

The Directory lists exhibitors and their contact details for use before, during and after the exhibition. Participants are invited to use it for meetings, follow-up and policy or commercial planning. All visitors to FoodAg 2026 are welcome.
